

To Whom It May Concern:

My name is Michael Snell and I have worked at the City of Melville as Landscape Team Leader for approximately three years.

Just recently Melville completed a landscape project involving a piece of public artwork beside the river, located at the Raffles Hotel site in Applecross.

The project had various components, one of which was the installation of coloured concrete and aggregate by Urbano Unique Stone, which was to be sandblasted to simulate ripples on the surface of water, thus exposing the aggregate.

The job required a high level of knowledge to ensure the colour of both the concrete and the aggregate matched the artwork that was already installed, while skillful sandblasting was crucial to achieve the desired ripple effect.

I found that Urbano Unique Stone was able to meet the requirements of this difficult and unique project most satisfactorily. The project was completed professionally, on time and looks great, and the advice provided throughout was accurate and helpful.

I have no absolutely hesitation in recommending Urbano Unique Stone to others, and the City of Melville is most satisfied with the finished product.

Yours Sincerely

Michael Snell
